

Estimator

Hitachi Canadian Industries Ltd. (HCI) is a major supplier of custom welding, machining, assembly and field services to the energy industry in Canada and around the world. We are currently looking for an **Estimator** to join our highly skilled team at our manufacturing plant in Saskatoon.

Responsibilities:

- Primary responsibility is creation of manufacturing cost estimates for customer RFQ's which include:
 - Reviewing customer drawings to determine initial capability
 - Developing preliminary process plans, tooling plans, and jig /fixture plans
 - Estimating fabrication and welding times including selecting welding process and welding arc on time
 - Calculation of weld volumes and working with purchasing on consumable pricing estimation and availability
 - Estimation of special processes required for work being quoted
 - Estimation of special equipment, jigs, and fixtures required
 - Review and analyze charged working hours to existing and completed jobs to ensure current/future performance and quoting standards are aligned
 - Maintaining and updating quoting standards
- Secondary responsibilities may include coordination of special projects including:
 - Working with the Lead Hands and Foreman to develop manufacturing plans and procedures for new orders
 - Design and creation of jigs and fixtures
 - Work with the shop staff to set up and prove process for first part, including hands on support where required

Qualifications:

- Journeyperson Certification in fabrication or welding (or equivalent experience)
- Specific knowledge of large fabrication and welding methods
- Demonstrated commitment to safety and safe operating practices
- Demonstrated ability to learn and a commitment to continuous improvement
- Good oral and written communication, interpersonal and computer skills are required

HCI is a wholly-owned subsidiary of Hitachi Ltd., and we enjoy the benefits of being part of a large international corporation and the advantages of operating locally.

We offer a competitive salary and benefits program and the chance to work on products that help generate energy locally and internationally.
